SUSTAINABILITY WITH RE:FIBRE

PUMA'S PROGRAM TO TRANSFORM TEXTILE WASTE AND OTHER USED MATERIALS INTO NEW TEXTILES. BY BEING MORE CIRCULAR WE CAN BE FOREVER BETTER.

Like many major actors in the industry, PUMA uses recycled plastic bottles as a main source of material to produce its garments made of recycled polyester. Through the RE:FIBRE program, PUMA aims to take more responsibility to reduce the impact of textile waste via a long-term solution for recycling.

01

COLLECT AND SORT

Collect and sort used garments, textile waste and other used materials.

02

SHRED AND MIX

Shred and mix the used garments and textile waste of 100% polyester.

03

DISSOLVE, FILTER AND POLYMERIZE

Dissolve filter and polymerize the shredded pieces.

04

MELT, SPIN, KNIT AND SEW

Melt, spin, knit and sew to create new garments.

RE:FIBRE KEY ATTRIBUTES

OF RE:FIBRE THE RE:FIBRE PROGRAM

RE:FIBRE COMING IN INLINE

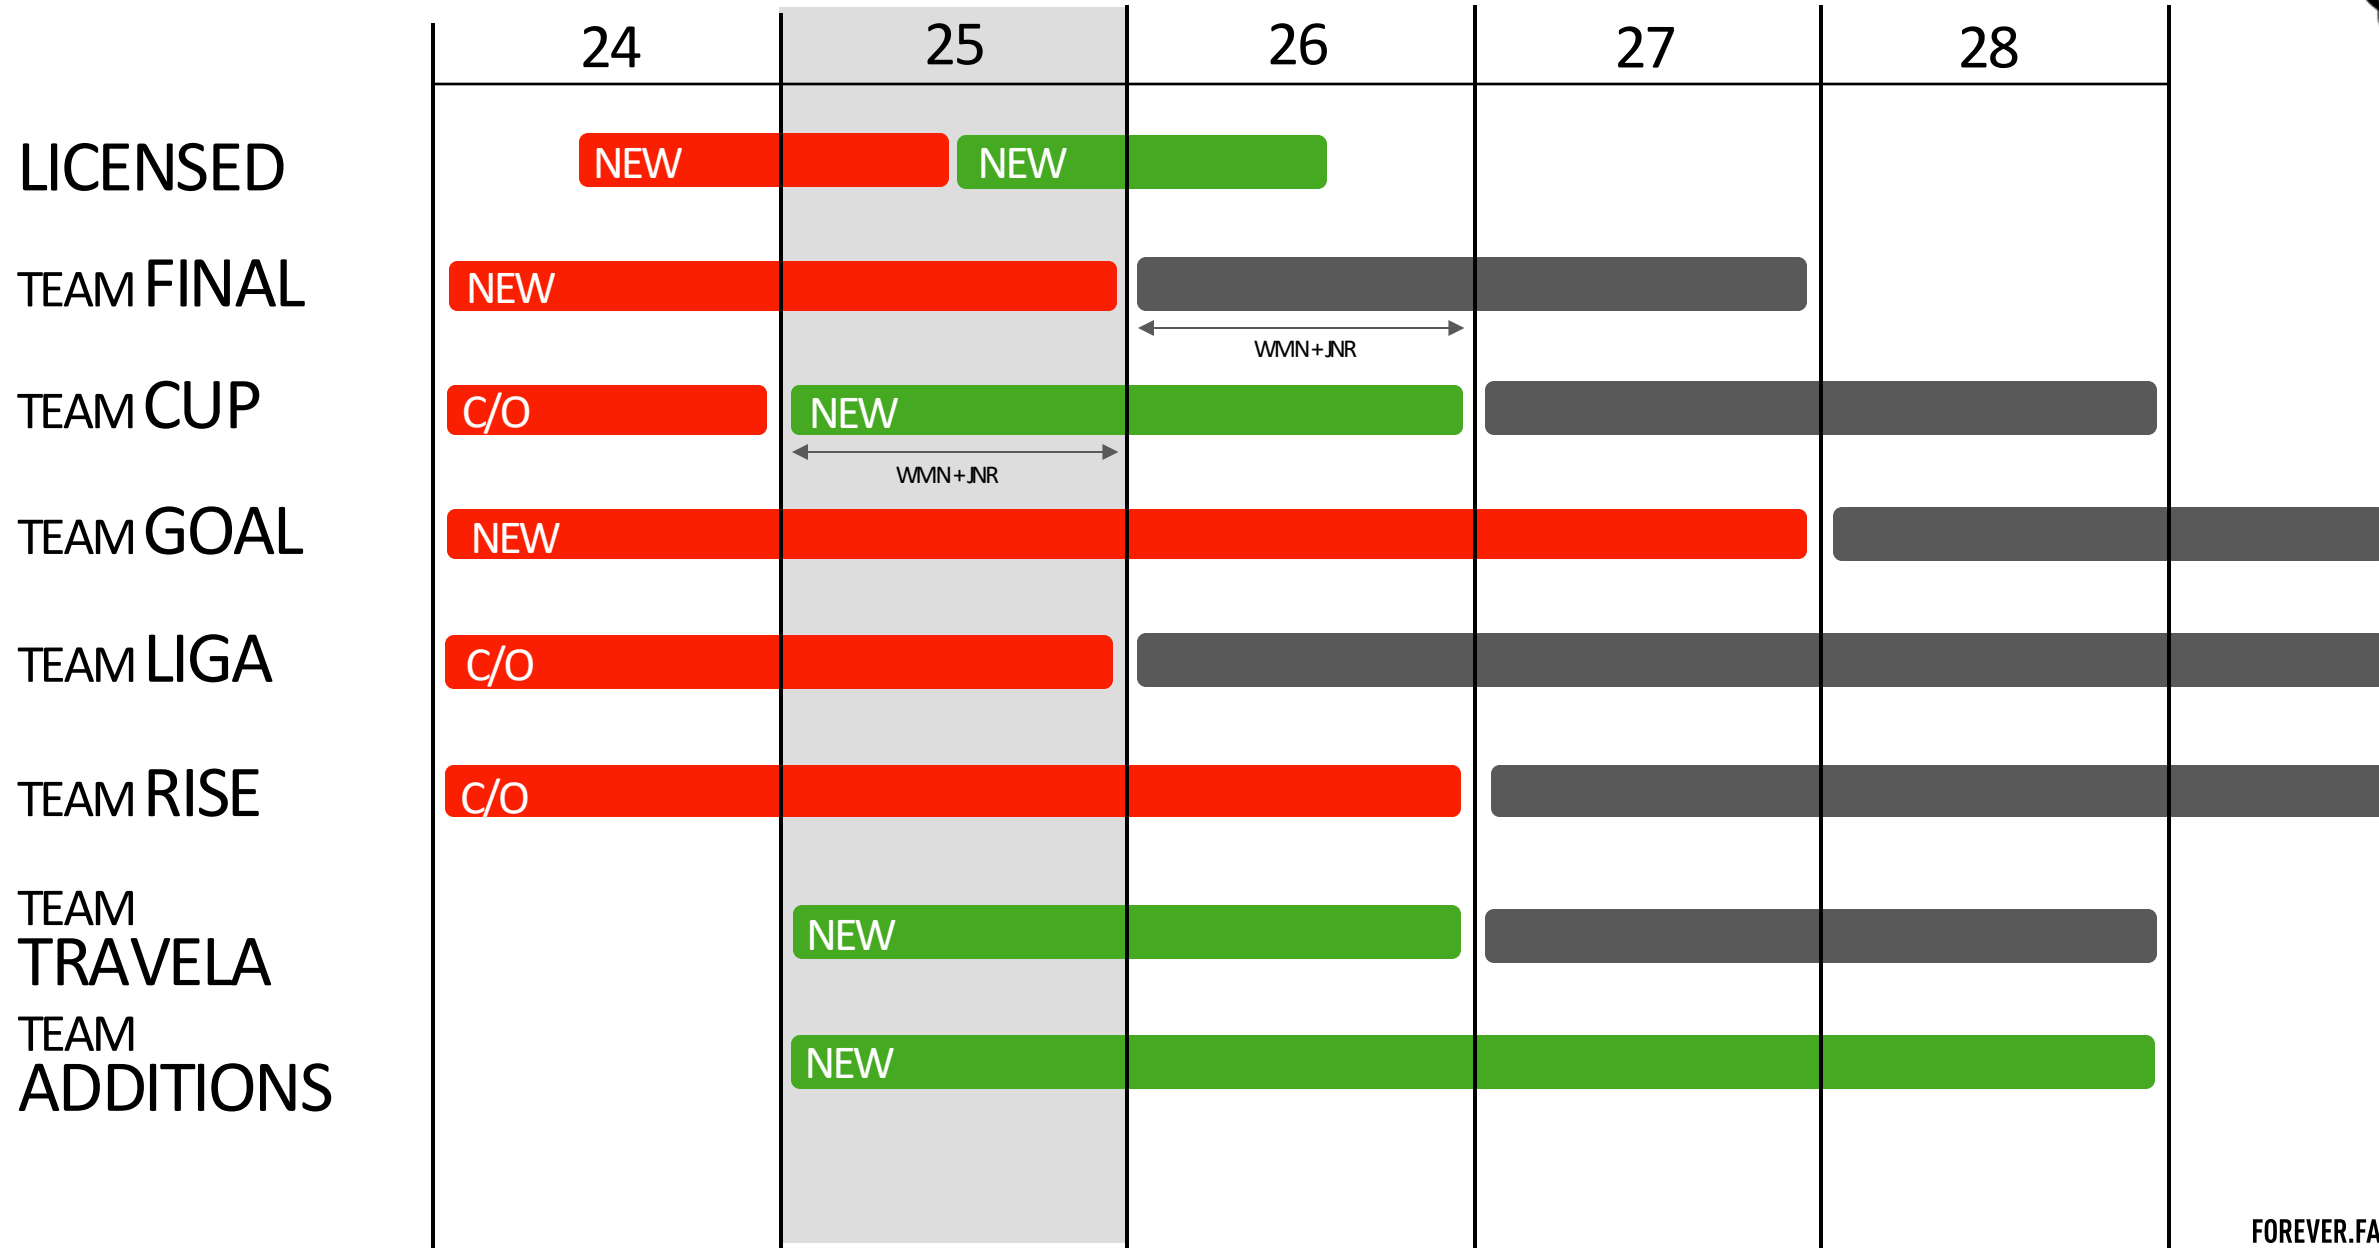

RE:FIBRE is continuing its steady growth into SS25. After successfully expanding RE:FIBRE at a big scale into our replica kits for clubs and federations, we are now extending our efforts to improve our collections by introducing RE:FIBRE into our inline range.

Look for the RE:FIBRE sign!
